

This package provides a list of Alberta Learning curriculum objectives from the Science program which we believe are met under the Urbanization and Wildlife program.

Curriculum Outcomes: Urbanization and Wildlife	Specific outcomes met
Grade 7	
Science	
Unit A – Interactions and Ecosystems	<p>1. Investigate and describe relationships between humans and their environments, and identify related issues and scientific questions</p> <ul style="list-style-type: none"> • describe examples of interaction and interdependency within an ecosystem <i>(e.g., identify examples of dependency between species, and describe adaptations involved; identify changing relationships between humans and their environments, over time and in different cultures—as, for example, in aboriginal cultures)</i> • identify examples of human impacts on ecosystems, and investigate and analyze the link between these impacts and the human wants and needs that give rise to them <i>(e.g., identify impacts of the use of plants and animals as sources of food, fiber and other materials; identify potential impacts of waste products on environments)</i> • analyze personal and public decisions that involve consideration of environmental impacts, and identify needs for scientific knowledge that can inform those decisions
